

# "The BIG BANG"

## A Complete Unique Package

Powerful and clean is the name of the game with "The Big Bang" from Power Brake Sales. The "Big Bang" includes a Hydro boost brake unit with master and lines, and a bracket to hold your choice of disc/disc or disc/drum proportioning valve.

**The result provides a simple, clean and functional look under the hood.**

An ideal solution for muscle cars, hot rods and off-road vehicles. Fixes the issue of limited vacuum due to modified engines. *Note: this unit requires a power steering pump to operate.*

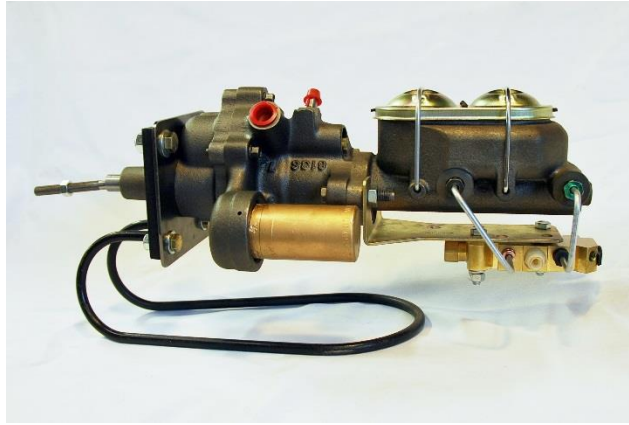

\*Photo shows The "Big Bang" on a black wire display stand which is not included.

Approximate dimensions 14 1/2" L x 7 or 8" W x 6 1/2" H

### Additional information and purchasing questions

- **Note: This unit requires a power steering pump to operate (no exceptions)**
- Bolt pattern is 4 bolt 3 3/8"W x 3 1/2"D – additional brackets, pedal assemblies and pushrod pedal connections are available at additional cost to fit most vehicles
- Master cylinder is a low profile style, dual bail, equal reservoirs unit, Short M/C lines can be installed on either side (engine or fender side) opposite side of M/C is plugged
- Proportioning valve is determined by the current\* brake configuration  
disc/drum = PV2 disc/disc = PV4 \*note - if conversion is planned down the road a new proportioning valve will be needed
- Modification to firewall is possible depending on vehicle, some bracket assemblies may negate firewall modification.
- “The Big Bang” is unassembled with hydro boost, master cylinder with short lines, proportioning valve and bracket kit and includes basic instructions.
- Additional hoses and fittings are required for operation.  
(A basic installation kit is available with reinforced hoses and fittings for an additional charge)
- Specific units can be assembled for a small, non-refundable fee of \$25

### Basic purchasing questions

1. Current brake configuration? disc/drum or disc/ disc (needed to determine correct proportioning valve)
2. Do you want the “Big Bang” assembled? (recommended option for a \$25 **non-refundable assembly fee**)
3. Do you want to purchase the Basic installation kit which includes the high pressure hoses and fittings?  
**\*\*\*High pressure fitting kit does not include fitting to power steering pump or steering rack**  
(those fittings usually can be found at any good parts store in your local area)

### Assembled questions

1. Year Make and Model of vehicle (to determine if brackets and connections are needed)
2. Master cylinder lines on engine or fender side
